The idea of sexual script brings a new metaphor and imagery for understanding human sexual activity as social and learned interactions. The concept was introduced by sociologists John H. Gagnon and William Simon in their 1973 book *Sexual Conduct*. The idea highlights three levels of scripting:

- Queer theory is a field of critical theory that emerged in the early 1990s out of queer studies (often, formerly, gay and lesbian studies) and women's studies. The term can have various meanings depending upon its usage, but has broadly been associated with the study and theorisation of gender and sexual practices that exist outside of heterosexuality, and which challenge the notion that.

Hookup culture has emerged from more general social shifts taking place during the last century. As early as the 1920s, with the rise of automobile use and novel entertainment venues throughout North America, traditional models of courting under parental supervision began to fade (Bailey, 1988; Stinson, 2010). An increase in “dating” during this period gave ... Diversity training represents the opportunity for employers to educate employees about diversity. Although diversity training cannot completely change an individual’s beliefs, it does have the ability to increase awareness, impart knowledge, and educate employees on how to accept differences among cultural identity, cultural experience(s), and cultural gap in the context of this work. Following this will be a discussion on CRT/CRF. Then we will address two questions: (1) in what ways does CRT/CRF connect with issues of ... Social constructionism is a theory of knowledge that holds that characteristics typically thought to be immutable and solely biological—such as gender, race, class, ability, and sexuality—are products of human definition and interpretation shaped by cultural and historical contexts (Subramaniam 2010). As such, social constructionism highlights the ways in which Tity and psyche, each of which is a complex cultural construction (J. For humans, the social is the natural. Therefore, in its feminist senses, gender cannot mean simply the cultural appropriation of biological sexual difference. Sexual difference is itself a fundamental—and scientifically contested—construction. Nov 02, 2011 · but some niche construction is cultural. New inventions can lead to new environments that have biological impact.
